Energy Use: 50 Watt	Energy Use: 9 Watt
	

### A happy customer.

*To Whom It May Concern,*

*Marshall Electrical conducted an audit, supply/install of my lighting, smoke alarms and power points to my 1980's house.*

*We had the cost effective LED lighting supplied throughout the house and the difference now is amazing. Previously a dark house, the LEDs have transformed the living areas, bedrooms and kitchen and have added a new dimension to how we see the indoors.*

*We chose the "day light" to brighten up the inside and we are very happy with the end result.*

*Marshall Electrical were totally professional and were able to advise us on the correct lighting for the house.*

*Regards, Mark Plummer*

### TERMS AND CONDITIONS

- Minimum order for promotional price is 10 replacements, a small extra charge is applicable for a smaller quantity.
- Standard single storey home with up to 3m high ceilings.
